Should I send the FS to PPG without the response letter?

FS is ready and they can start reviewing but the response letter wont be ready until Monday. I can make a general statement saying that our formal response to PPGs letter is still under review but generally we have determined lead is a site-related contaminant and is impacting the groundwater. Due to this determination, the proposed groundwater alternative 5 would not meet groundwater ARARs and is screened out.

Fyi, attached is PPGs letter.

Thanks,

Josh
